The ACE Mentor Program is free and open to any high school student who has the curiosity and drive to learn about a career in design and construction — from contracting and engineering to architecture & interior design.

The ACE360 Project will provide students with essential life-skills and professional development support in order to enhance their ACE experience and provide a full circle overview of the journey into a career.

Students will work with architects, engineers and contractors on mock design challenges within the Greater Philadelphia area, while building the confidence and skills to compete with their counterparts by successfully completing applications, writing impactful essays, developing impressive resumes, and practicing communication skills in mock interviews - in person or virtually!
